Product Description

Ford Transit 10-18 Diesel 4x2 Bus

Product introduction:

Ford Transit prototype is the latest model of Ford Transit series in Europe and the mainstream model of European light passengers at present. With its advanced technology and outstanding quality, it won the highest award in the field of commercial vehicles in Europe, "2007 International Best Commercial Vehicle Award".

In 2007, Ford of the United States and Jiangling Motors jointly developed and introduced Transit, a European classic brand, to China. With its Ford brand, international quality, spacious and comfortable driving space and people-oriented safety design, Transit Automobile has maintained an annual growth rate of more than 30% for 10 consecutive years, and quickly became the leading brand in the mid-to high-end light bus market in China.

The "four modernizations" trend of "diesel, car, safety and environmental protection" of light passenger products in the world has been well reflected in Ford Transit. In terms of power, space, comfort, control and load bearing, Ford New Generation Transit has broken through the previous standards of light passengers and set a new benchmark for the industry.

Ford New Transit is a commercial household multi-function vehicle. The gearbox is silky and easy to shift, and comfort is a blessing. The large screen is beyond imagination, and the wide field of vision is a blessing. Intelligent LED headlights are

equipped with intelligent dimming as standard, and driving at night is a blessing. Parking operation is more convenient, and peace of mind is a blessing. It adopts a load-bearing body design, and the front suspension is McPherson-style, and the rear suspension is a small number of variable cross-section leaf springs. The driver's seat airbag, ABS8.0, and. Ford Transit has set a new benchmark for the light passenger market.
