Product Description

Highway tourist transportation bus 24-52 seats diesel rear rear drive 6x2

A tourist coach, also known as a tour bus or tourist bus, is a large passenger vehicle specifically designed for tourism and long-distance travel. Here is a description of a tourist coach:

Size and seating capacity: Tourist coaches are typically large vehicles with a spacious body. They can accommodate a significant number of passengers, ranging from 40 to 60 or more, depending on the specific model and configuration. The seating layout is designed to provide comfort and ample legroom for passengers.

Amenities and comfort: Tourist coaches are equipped with various amenities to ensure passenger comfort during long journeys. These may include comfortable reclining seats, air conditioning systems, onboard restrooms, overhead storage compartments for luggage, and sometimes even individual entertainment systems with screens for each seat. The interior is designed to create a pleasant and relaxing environment for passengers.

Tourist-focused features: Tourist coaches often come with features tailored for sightseeing and tourism purposes. Large windows provide panoramic views, allowing passengers to enjoy the scenic landscapes along their journey. Some coaches may also have a PA system or audio guide system to provide commentary or information about the destinations visited.

Safety features: Safety is a top priority in tourist coaches. They are equipped with safety features such as seat belts for all passengers, emergency exits, fire suppression systems, anti-lock braking systems (ABS), and electronic stability control (ESC). Additionally, some coaches may have surveillance cameras to ensure the security of passengers.

Luggage storage capacity: Tourist coaches have ample storage space for luggage. They usually have compartments underneath the bus or dedicated luggage racks inside the vehicle, allowing passengers to store their belongings securely during the journey.

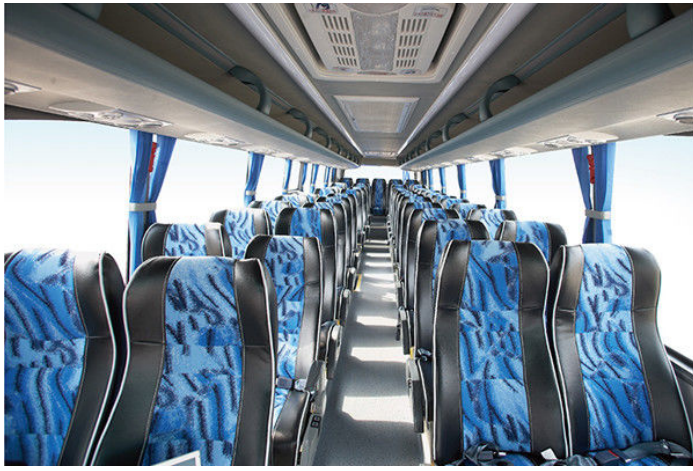

Long-distance and tourism applications: Tourist coaches are primarily designed for long-distance travel and tourism purposes. They are commonly used for guided tours, sightseeing trips, airport transfers, and transportation of tour groups. These coaches are built to handle different road conditions and provide a comfortable and convenient travel experience for tourists.
